WELCOME, THIS WEB CONFERENCE WILL BEGIN SOON

Ending Child Sexual Abuse

web conference series

PREVENTING THE PERPETRATION OF CHILD SEXUAL ABUSE

• Web Conference Series Host

Cordelia Anderson

MS. FOUNDATION

Ending child sexual abuse is one of the most strategic things we can do to improve the lives of women and communities.

WEB CONFERENCE SERIES

Build online community working to end child sexual abuse

- Raise visibility and dialogue on CSA within prevention community
- Engage new communities in this movement
- Increase knowledge, resources and strategic action on CSA

Science & Stories

Speakers

Joan Tabachnick, MPPM
DSM Consulting

David Prescott, L.I.C.S.W

Clinical Director

Becket Family of Services

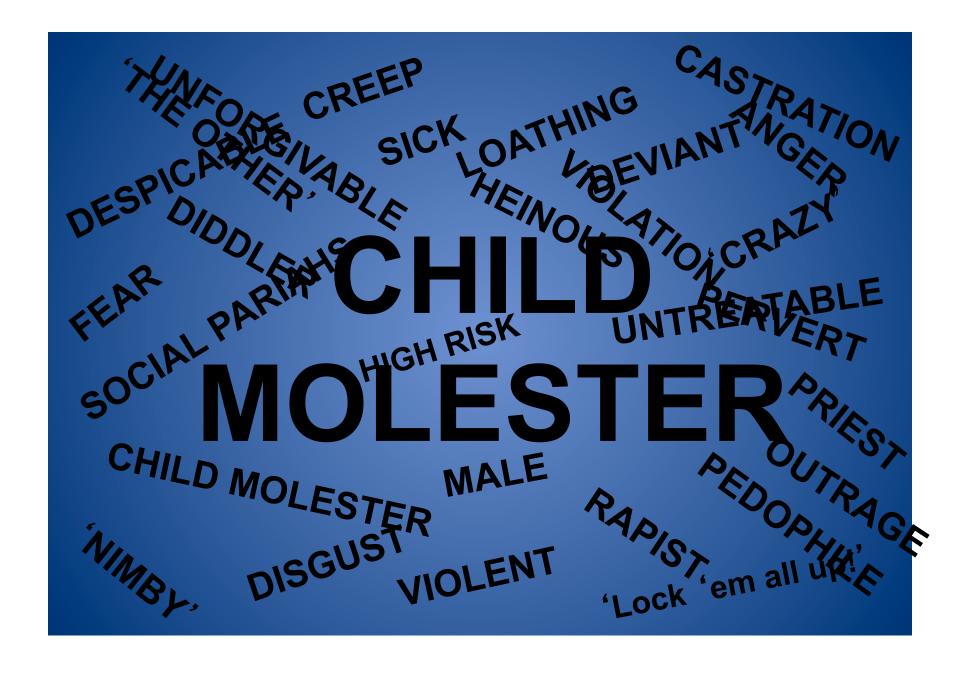

People are Listening...

"Policymakers, the media and our communities are talking about sex offenders. They want to know how they can feel safer."

-- Suzanne Brown-McBride

Child Molester

In fact...

- Sometimes our own language gets in the way of understanding the people we are talking about:
 - "Sex offender"
 - "Sexual predator"
 - "Undetected rapist"

Sex Offender

Who Sexually Abuses Children?

There is NO sex offender profile

Who Sexually Abuses Children?

- •93% of victims were abused by someone they knew.
- 34% of victims were abused by family members.
- 30-50% of victims were abused by peers or older children.

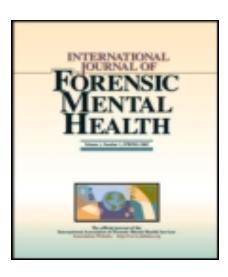

Adults Who Abuse

- Child molestation (versus pedophilia)
 - Likelihood of re-offense declines with age
 - Re-offense rates incest lower than for those who molest outside the family
- Pedophilia
 - Can include those who don't molest
 - DSM-5 controversies

Adults Who Abuse

- Re-offense rates
 - 13.7% (Hanson & Morton-Bourgon, 2005)
 - Large-scale study (29,450 offenders)
 - 24% at 15 years (Harris & Hanson, 2004)
 - Longer-term follow-up (4,724 offenders)

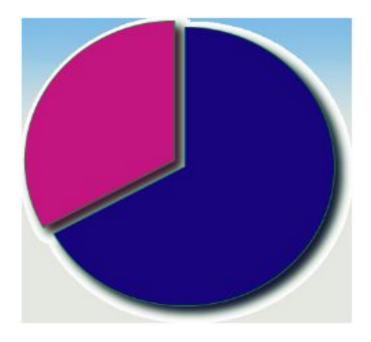

Adults Who Abuse

 When an adult abuses again, it is more likely in first years after release to the community

Adolescents Who Abuse

 30-50% of those who abuse children are adolescents or children

Adolescents Who Abuse

- True sexual disorders are rare
- Sexual re-offense rates less than 10%
- 50% re-arrest rate for other crimes (Viljoen et al, 2012)

web conference series

Heterogeneity

CHILDREN

Critical Approach

- Risk
- Need
- Responsivity

Treatment and Management

Adults:

- Methods matter
- Community supervision matters
- Therapist characteristics matter

Treatment

Youth:

- Less likely than adults to reoffend (sexually)
- More responsive to intervention than adults

Key Treatment Targets

- Abuse-related sexual interests
- Contributory attitudes
- Self-management
- Interpersonal functioning

What We Don't Know

- How people desist
- Predicting situational factors that contribute to abuse
- Why reported rates of known sexual violence are declining

What Now?

- Punishment-only approaches don't work
- Treatment and supervision can work
- Treatment and supervision <u>combined</u> work better
- Mission critical:
 - Support and accountability

Risk Factors to Consider

Family Risk Factors

- History of Abuse
- Parenting Practices
- Parental Loss
- Parental Instability

Behavior Problems

- Externalizing (substance abuse, non-violent/violent delinquency)
- Internalizing (major mental illness, PTSD)

Sexual Problems

- Early Onset of Sexual Behavior
- Deviant Sexual Interest
- Sexual Externalizing
- Sexual Inhibition 2008)

(Whitaker, et al,

Recent ADULT Research

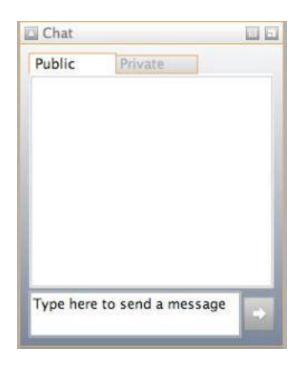

Risk Factors for Sexually Problematic Behavior

- Early physical & sexual abuse & neglect
- Rigid gender roles
- Impersonal sex
- Rape supportive attitudes
- Callousness, unemotional (lack of guilt, lack of empathy)
- Hypersexuality
- Sexualizing children, over identifying with children
- Impulsivity, alcohol abuse
- Not perceiving own risk
 Raymond Knight, Judith Sims-Knight, Suzanne Brown-McBride, 2009

Recent ADOLESCENT Research

- Risk Factors for Sexually Problematic Behavior
 - Findings suggest that risk factors for BOTH general delinquency & sexual offending behavior contribute to juvenile sex offenses
 Seto and Lalumière, 2010
 - Teens are subject to change without notice

How is this research information useful for your prevention work?

Perpetration Prevention

 "All of the signs were there and no one... no one in my family, not one of my friends, and no one at work ever bothered to ask me about them."

Sex offender in prison

4 Precondition Model

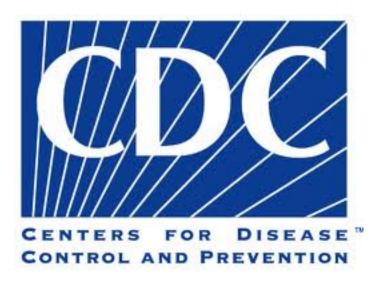

- Motivated to sexually abuse
- Overcome internal inhibitions
- Overcome external inhibitions
- Overcome child's resistance

David Finkelhor, 1984

Primary Prevention

 Approaches that take place BEFORE sexual violence has occurred been perpetrated to prevent initial perpetration and victimization

How Do You Respond?

- Green Light:
 - Increase Adult Involvement
- Yellow Light:
 - Family Responds
- Red Light:
 - System Intervention

Developmentally Expected

• Educate ourselves about how to distinguish developmentally expected sexual behaviors in children from those that might indicate a potential problem.

Continuum of Behaviors

- Healthy, age-appropriate, mutually respectful & safe →
- Mutually flirtatious & playful →
- Age-inappropriate or non-mutual →
- Harassment →
- Sexually abusive & violent

Adapted from Cordelia Anderson

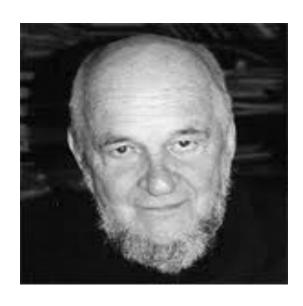

Ending Child Sexual Abuse

web conference series

Perpetration Prevention

 "No epidemic has ever been resolved by paying attention to the treatment of the affected individual."

George W Albee, Ph.D.

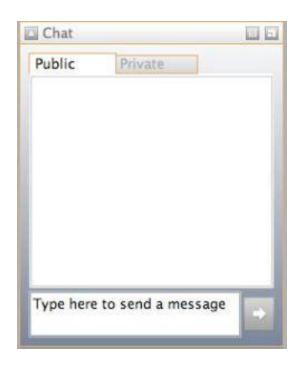

• Involve Individuals, Families, Communities, All of Us...
