National Sexual Assault Conference

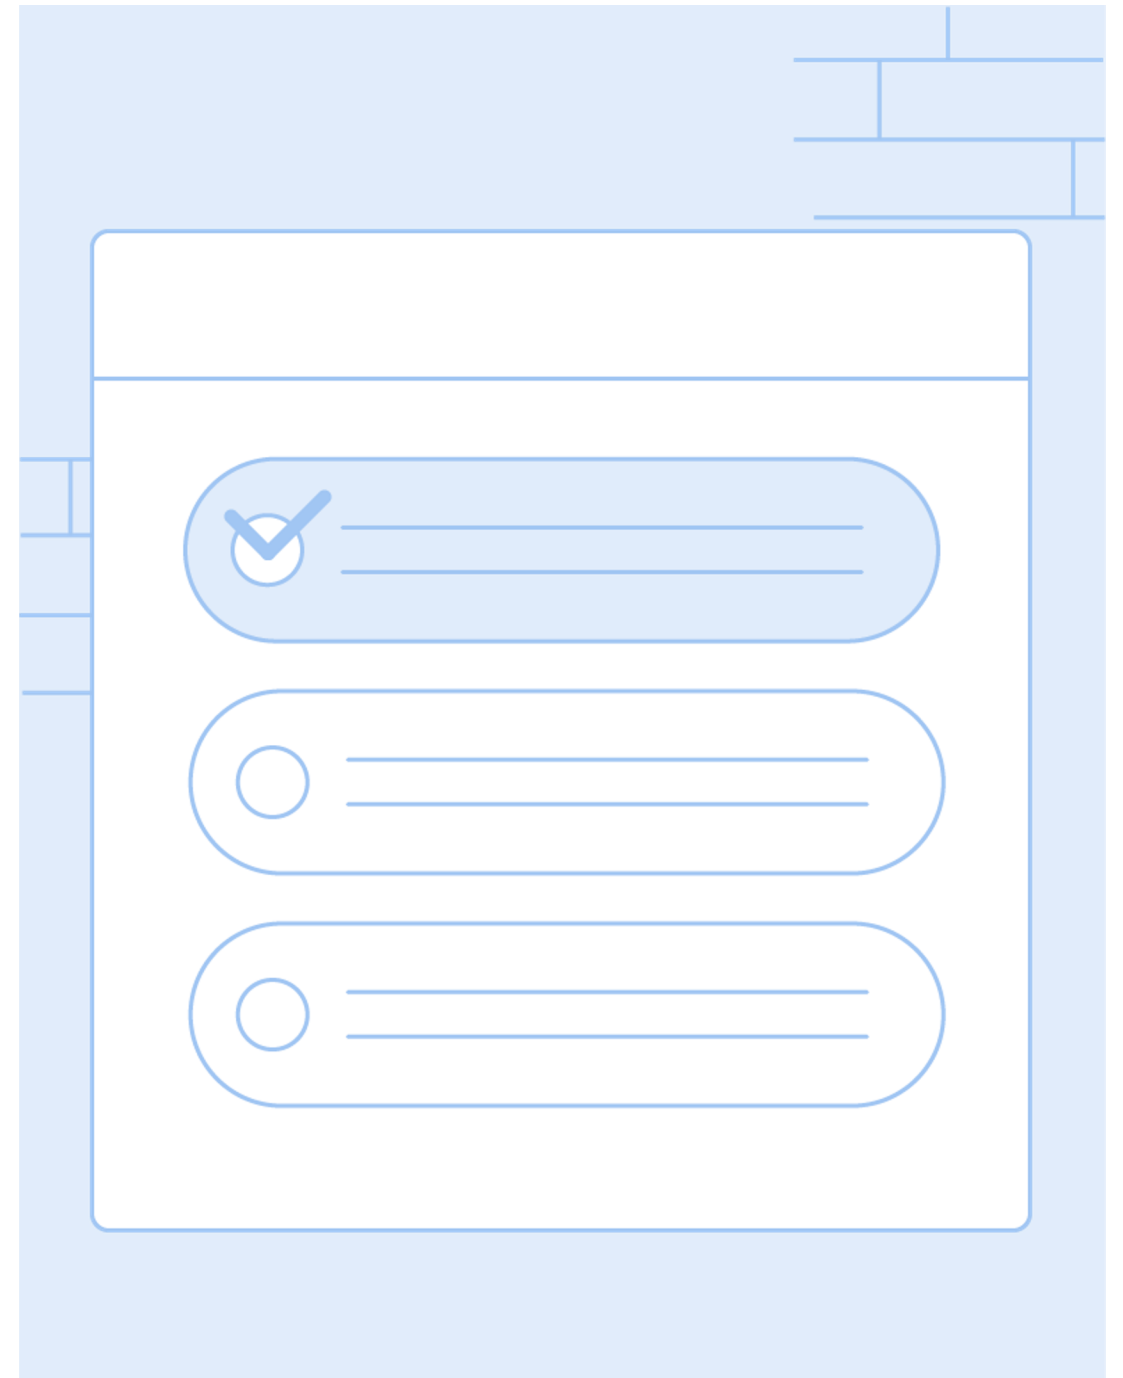

How to use Zoom

- ▶ Text chat
- ▶ PowerPoint Slides
- ▶ Polling Questions
- ▶ Phone
- ▶ Closed Captioning
- ▶ Web Conference Guidelines

Have you attended a PreventConnect Web Conference before?

Polling Question

The illustration shows a light blue rectangular box representing a poll interface. Inside the box, there are three rounded rectangular buttons stacked vertically. Each button contains a circular icon on the left and two horizontal lines on the right for text. The top button's icon contains a checkmark, indicating it is the selected option. The bottom two buttons' icons contain empty circles, indicating they are not selected. The background of the slide features a faint brick wall pattern.

PreventConnect

- ▶ Domestic violence/intimate partner violence
- ▶ Sexual violence
- ▶ Violence across the lifespan, including child sexual abuse
- ▶ Prevent before violence starts
- ▶ Connect to other forms of violence and oppression
- ▶ Connect to other prevention practitioners

Introduction to Data Sharing and Integration to Advance Sexual and Intimate Partner Violence Prevention

Thursday, July 6, 2023
11:00 AM PT/2:00 PM ET

PreventConnect is a national project of ValorUS sponsored by the U.S. Centers for Disease Control and Prevention. The views and information provided in this web conference do not necessarily represent the official views of the U.S. government, CDC or VALOR.

Objectives

- Gain deeper understanding of how cross-sector data can transform information about individuals into actionable intelligence that can be used to understand needs, improve implementation, and build stronger, healthier, and more just communities.
- Describe core benefits, limitations, and risks inherent to administrative data reuse.

How do you feel about data?

Polling Question

A stylized illustration of a document or form. It features three rounded rectangular input fields stacked vertically. The top field is highlighted in light blue and contains a checkmark icon. The other two fields are white with a light blue border and contain empty circles. The background is light blue with faint grid lines.

Common uses of data in prevention practice

- Understand prevalence and scope of the problem
- Identify priorities
- Select prevention strategies
- Evaluate prevention strategies
- Inform policy solutions
- Data is collected for funders

How are you most commonly using data in your prevention practice?

Text Chat Question

Chat

From Me to **Everyone**:

Use this text chat box to respond to our questions, ask your own, and connect with others!

To: **Everyone** ▼

Type message here...

...and we know violence is connected to many other issues

- Lots of information is collected on the **occurrence** of sexual and intimate partner violence
- Limited data available on the **full context** + risk and protective factors

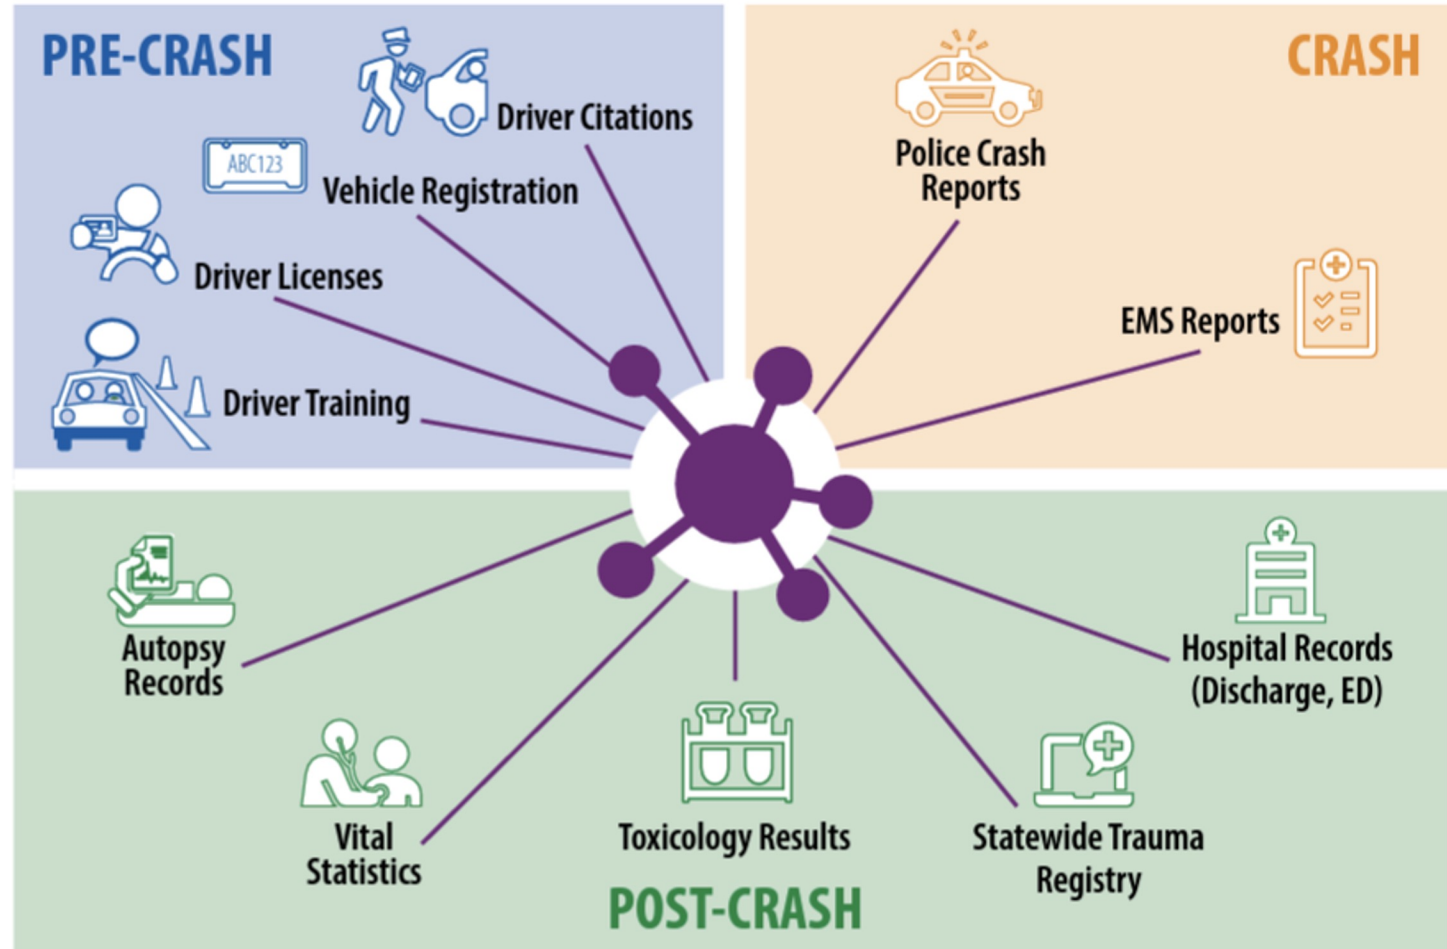

Data silos
constrain our
ability to
understand
complex public
health issues

An example

When motor vehicle crash information is linked to emergency department records, public health officials can identify the protective factors most strongly associated with health outcomes.

What data would
help you better
understand the
context of sexual
and intimate partner
violence?
